PRISMA 2020 flow diagram — Review 2 (corrected version, robustness pass 23 October 2026)

Identification (databases and registers, searched 22 Oct 2026)
Records retrieved: 16,497
(PubMed 372; Europe PMC 14,090; OpenAIRE 10;
Crossref 2 x 1,000; OpenAlex test page 25)

Attempted and blocked, never counted as searched:
arXiv and Semantic Scholar (HTTP 429 / timeout, v1 and on retry);
OpenAlex full retrieval blocked on retry (HTTP 429, shared budget)

Identification (other methods, robustness pass)
Citation chasing candidates: 979
(reference lists and citing works of the 26 included
studies and 2 competing reviews, via Europe PMC/Crossref)

Chasing candidates already in the database set: 454
Within-set duplicates: 36
New records from chasing: 489

Duplicates removed before screening: 512

Records screened (title and abstract): 16,474
(15,985 database set + 489 chasing records)
Dual independent screening; disagreements adjudicated
by reading (913 + 54 records)

→ Records excluded at screening: 16,181

Reports sought for retrieval: 293
(122 first pass + 161 after re-adjudication
+ 10 from chasing)

→ Reports not retrieved: 115
(46 + 66 + 3)

Reports assessed for eligibility (full text): 178
(76 + 95 + 7)

→ Reports excluded at full text: 111
(48 + 58 + 5), one reason each

Studies included in the corrected review: 64

Generation experiments: 63 studies (148 model arms)
66 reports: 25 first-pass studies (27 reports, one duplicate
report merged at study level in the robustness pass),
37 studies from re-adjudicated disagreements,
2 studies from citation chasing

Published-literature audit (separate stratum): 1 study (Yin 2026)

First version (22 Oct 2026) for comparison: 15,985 screened; 122 sought; 76 assessed; 26 studies included (25 generation + 1 audit).
